

# ATLAS DES OISEUX NICHEURS DE VENDÉE 1985-1989

Œuvre collective des membres  
du Groupe Ornithologique Vendéen  
Coordinateur Christian GOYAUD

De 1985 à 1989 le Groupe Ornithologique Vendéen, avant qu'il ne devienne LPO-Vendée, a réalisé une enquête sur les oiseaux nicheurs du département. Cet important travail de terrain répondait à la demande de la Société Ornithologique de France qui sollicitait les groupes ornithologiques pour actualiser l'Atlas des Oiseaux Nicheurs de France dont la précédente édition datait de 1976. Deux actualisations de l'atlas national avait déjà été réalisées par le GOV pour le département, l'une en 1982 et l'autre en 1985.

En Vendée, le GOV lança l'enquête non pas sur une trame au 1/50 000 comme pour l'atlas national mais sur une trame au 1/25 000 correspondant au découpage des anciennes cartes de l'Institut Géographique National. Ce choix permet de multiplier par quatre la précision des informations figurant sur les cartes de répartition et augmenta d'autant le travail de terrain.

Les faisans et les perdrix n'ont pas été cartographiés en raison des lâchers annuels qui perturbent l'étude sur le terrain et rendent incertain le statut de ces espèces.

Découpage de la Vendée selon la trame au 1/50 000 en traits forts, complété par des pointillés pour la trame au 1/25 000.

Le statut de l'espèce est indiqué par un disque noir de taille variable :

- nicheur certain
- nicheur probable
- nicheur possible
